## Part 3: How to submit a Webflow Form into the CMS with Multi-Reference fields

---

This is your bonus material that goes along with the video.

1. All of my sharable Zaps:

- Commentable - New Comment:
  - Add this Zap to your own account:  
<https://zapier.com/shared/4c98571bb2c3a07f1c14351becf07a2c3df7d4ae>
- Commentable - New Member
  - Zapier won't share private Zaps. Unfortunately the MemberStack zaps are private (this is set by MemberStack). So instead, scroll to the bottom of this document and I provide screenshots of every step and setting for this Zap.

2. This Read-Only Webflow project:

With the below link, you can open up this Webflow project in the designer and dig into all the settings I made in the video.

[https://preview.webflow.com/preview/commentable?utm\\_medium=preview\\_link&utm\\_source=designer&utm\\_content=commentable&preview=693a8b15824b43834fc99ffc36de5ce9&mode=preview](https://preview.webflow.com/preview/commentable?utm_medium=preview_link&utm_source=designer&utm_content=commentable&preview=693a8b15824b43834fc99ffc36de5ce9&mode=preview)

3. The live site:

Here is the link to the live site, go signup, add some comments, log out, give it a test drive and see how it's supposed to work:

<https://commentable.webflow.io/>

#### 4. The CheatSheet:

This is the detailed workflow I used to create the video you watched. It's super detailed and will walk you through the end-to-end setup.

\* *Webflow*

Open the your previously built Commentable project

- Create Members CMS collection

Name: Members

Add a plain text field named: Member Id

Save field

Create Collection

- Update Comments CMS collection

Add a new Multi-reference field named: Member

Select the Collection: Members

Save field

Save Collection

- Add Embed element to the Form

Under the Form element

Add an Embed element

Insert this line of code:

```
<input type="hidden" name="Member Id" ms-data="id">
```

Click Save & Close

Under the Navigator select the Form element

Right side Element Settings pane (gear icon)

Under Form Settings

Form Name: Comment

- Create a New Page

Named: Welcome

Click Create

Go back to the home page in the Designer

Copy the header section

Go back to the welcome page

Paste

Add a new section element below

Add a new contain element within

Add a new Div element within

Add another new Div element below

Add an Image element to the top Div  
Click Choose Image  
Upload an animated loading spinner  
Resize  
Select it's Div element  
Center

Add a heading element to the second div  
Choose: H5  
Relabel it: Please wait while we setup your account...  
Center

Edit page settings  
Scroll to the bottom  
Under: Before </body> tag  
Paste the following code:

```
<script>
var Webflow = Webflow || [];
Webflow.push(function() {
  MemberStack.onReady.then(function(member) {
    if(member.memberPage){
      window.location.replace("/");
    }else{
      setTimeout(function() { location.reload(true); }, 3000);
    }
  })
});
</script>
```

Click Save  
Publish

*\* Give it a try*

Open Live Site  
Signup  
Add a comment  
You should see no comments  
Let's fix that now!

*\* MemberStack*

Open up Memberstack to the website used in the last video.

- Member specific pages

Left side nav bar  
Select Power-ups  
Then Power-ups sub menu  
Scroll down to Member-specific pages  
Expand

Under Hide a folder or CMS collection  
Add: members/

Under Access Denied URL  
Add: /

Activate

\* *Airtable*

Open Airtable  
Add a base  
Start from scratch  
Name: Commentable

Change tab name to: MemberStack to Webflow

First column named: ID  
Column type: Formula "RECORD\_ID()"

Second column named: Webflow Member Id  
Column type: Single Line Text

Third column named: MemberStack Id  
Column type: Single Line Text

Fourth column named: Name (email)  
Column type: Single Line Text

Fifth column named: Created Time  
Column type: Created Time

Delete all records leaving just the column headers

Done

\* *Zapier*

- New Member

Make a Zap  
Named: Commentable - New Member

- Step 1

Choose App: MemberStack  
Choose Trigger Event: New Member  
Click Continue

Choose Account: <Existing MemberStack Account>  
"You should have an existing member in Memberstack  
from the last video. Select one of the sample members."

Test & Review  
Click done editing button

- Step 2

Choose App: MemberStack

Choose Action Event: Update Member

Click Continue

Choose Account: <Existing MemberStack Account>

Click Continue

Customize Member

Fill in the Member Id field with the ID

Fill in the Member Page field with the same ID

Click Continue

Test & Review

Click done editing button

- Step 3

Choose App: Webflow

Choose Action Event: Create Live Item

Click Continue

Choose Account: <Existing Webflow Project>

Click Continue

Site: <Existing Webflow Project>

Collection: Members

Name: New Member in MemberStack: Email

Slug: New Member in MemberStack: ID

Archived, Draft: No

Click Continue

Test & Review

Click done editing

Check the Members CMS collection in Webflow

- Step 4

Choose App: Airtable

Choose Action Event: Create Record

Click Continue

Airtable Account: Select existing or Add a New Account

Click Continue

Base: Commentable

Table: MemberStack to Webflow

ID: <Leave Blank>

Webflow Member Id: Create Live Item in Webflow: ID

MemberStack Id: New Member in MemberStack: ID

Name (email): Create Live Item in Webflow: Name

Created Time: <Leave Blank>

Click Continue

Test & Review

Click done editing

"Open Airtable, the Commentable base, and find the record listed under the MemberStack to Webflow tab. All fields should be filled out."

Back to Zapier  
Turn Zap on  
Back to Webflow  
Publish Site  
Open Live Site  
Signup  
Leave a Comment  
It should NOT have worked, let's fix that...

- New Comment:

Make a Zap  
Named: Commentable - New Comment

- Step 1

Choose App: Webflow  
Choose Trigger Event: Form Submission  
Click Continue

Webflow Account: <Existing Webflow Project>  
Click Continue

Site Name: <Existing Webflow Project>  
Form Name: Comment  
Click Continue  
Test & Review  
Select 1 Sample Data  
Click Done Editing

- Step 2

Choose App: Airtable  
Choose Action Event: Find Record  
Click Continue

Airtable Account: <Existing Airtable Account>  
Click Continue

Base: Commentable  
Table: MemberStack to Webflow  
Search by Field: MemberStack Id  
Search Value: Form Submission on Webflow: Data Member Id  
Click Continue  
Test & Review  
Click Done Editing

- Step 3

Choose App: Webflow  
Choose Action Event: Create Live Item  
Click Continue

Choose Account: <Existing Webflow Project>  
Click Continue

Site: <Existing Webflow Project>  
Collection: Comments  
Comment: Form Submission in Webflow: Data Comment  
Comment Id: <Leave Blank>  
Member: Find Record in Airtable: Fields Webflow Member Id  
Name: Form Submission in Webflow: Data Name  
Slug: <Leave Blank>  
Archived, Draft: No  
Click Continue  
Test & Review  
Click Done Editing

Flip over to Webflow  
Refresh browser tab  
Open Comments CMS Collection

"Verify comment exists and the Member lists the email address of the member who created this comment."

Back to Zapier  
Turn this Zap on

\* *MemberStack*

Open up Memberstack to the website used in the last video.

- Update Membership

Left side nav bar  
Select: Memberships  
Under Membership Plans  
Select: Basic  
Under: Page after signup  
Add: welcome  
You should see a green check to confirm  
Click Save & Close

- Back to Webflow

Next to the signup link  
Add a Text Link element  
Named: My Comments  
Add right margin

- Back to MemberStack

Under member page link (in the Member-specific pages section)  
Copy the Name

- Back to Webflow

Right side, Element Settings tab (gear icon)  
Under Custom Attributes  
Add new attribute

Paste inside the name field

- Back to MemberStack

Under member page link (in the Member-specific pages section)  
Copy the Value

- Back to Webflow

Paste inside the value field  
Click Save

*\* Give it a try...*

In Webflow Designer

Publish

Open Live Site

Signup

You should hit the welcome page

You should be redirected to the home page

You should see the Logout and My Comments links

Add Comment

Click the My Comments link

You should get a 404 page

Let's fix that now...

*\* Setup Members Page*

Back to the Webflow Designer

Open up Pages

Under CMS Collection Pages (bottom)

Select Members Templates

- Add Header

Add a section element

Add a Container element within it

Add a Heading element within it

Choose: H3

Check: Get text from Members

Dropdown Select: Name

Center

- Add Comments

Add a section element

Add a Container element within it

Add a Collection List element within it

Add 2 Div elements within it (vertically)

Add a Heading element in the top Div

Choose: H4

Check: Get text from Comments

Dropdown Select: Name

Add a Paragraph element to the bottom Div

Check: Get text from Comments  
Dropdown Select: Comment

- Filter

Select the Collection List Wrapper  
Under Element Settings (gear icon)  
Under Filters  
Add new filter  
Select: Member (Multi-reference)  
Select: Contains  
Select: Current Member  
Click Save

Publish

*\* Give it a try...*

Back to the Live Site  
Click the My Comments link  
You should now see only your comment and no others!

*\* Done*

Welcome page code:

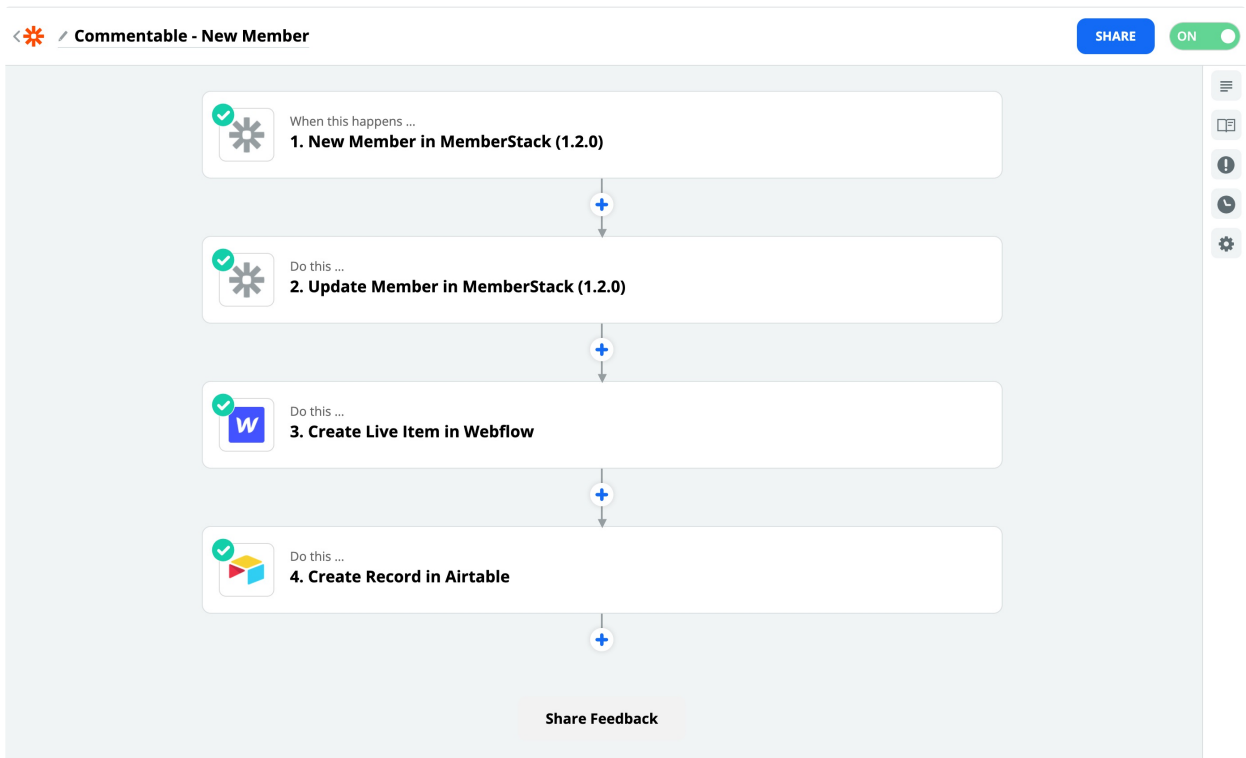

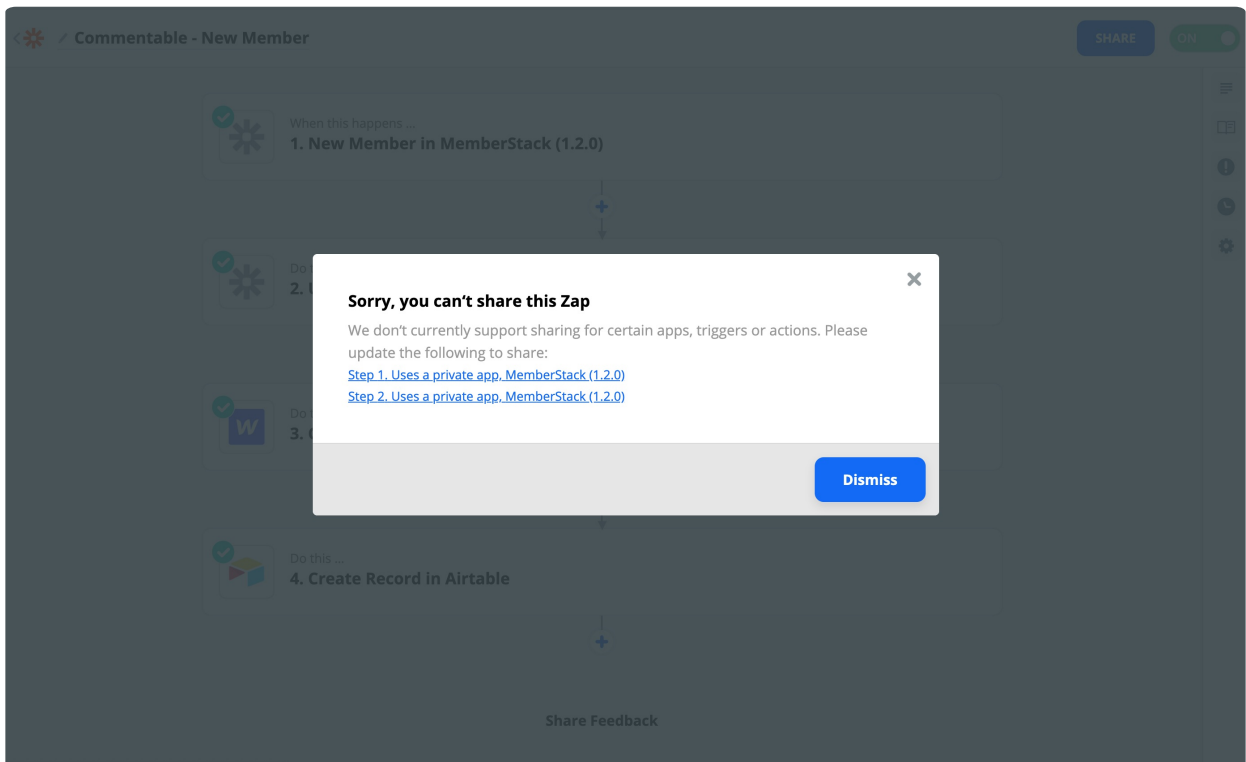

```
<script>
var Webflow = Webflow || [];
Webflow.push(function() {
  MemberStack.onReady.then(function(member) {
    if(member.memberPage){
      window.location.replace("/");
    }else{
      setTimeout(function() { location.reload(true); }, 3000);
    }
  })
});
</script>
```

Embed code:

```
<input type="hidden" name="Member Id" ms-data="id">
```
